

# *B2B F&B eCommerce System*

## *Introduction*

*Our website is based on a B2B Company located in Goa. We deal with companies who cannot sell or have difficulties in selling their products in Goan Market. We have a network built in the Goan market which help companies making their work easier if they want to launch their products in Goan Market.*

## *Technologies used*

- 1. React*
- 2. Redux*
- 3. Express*
- 4. Node*
- 5. Mongo DB*
- 6. Mongoose*
- 7. Jwt*
- 8. HTML5*
- 9. CSS3*

## *System requirements*

- 1. Windows or any other operating system*
- 2. Processor: Intel Pentium or later*
- 3. Memory: 2 GB or more*
- 4. Screen resolution: 1280x1024 or larger*

- 6. Latest browser, preferably Chrome*

## *About the website*

- 1. Three users: Product sender, Reseller (Admin) & Customer.*
- 2. Product sender first sends proposal to admin to allow him to trade. If admin accepts the proposal sent by the sender, sender will now have access to upload product and send for approval.*
- 3. Admin will either approve or disapprove the product, if approved the product will be on sale.*
- 4. The customer can order the product from the site*

*Features:*

- 1. ChatBot – User Interaction with Bot for help*
- 2. Login/Signup – User can register and login for further process on website*
- 3. Add Products - user has to add products on approval of proposal*
- 4. Approve/Disapprove product and Proposal - Admin can approve and disapprove product and proposal*
- 5. Order Products – Buyer can order products from website.*
- 6. View stats of sales – Admin and product owner can view stats of products and applications approved*
